

# Obniz in M5StickC

ObnizOSをM5StickCで使う

# Hello World

```
const obniz = new Obniz.M5StickC('');
```

```
obniz.display.clear();  
obniz.display.print('Hello World');
```

# LED

```
obniz.led.on();
```

# LED

```
obniz.led.off();
```

# Button

```
obniz.buttonA.onchange = (state) => {  
  obniz.display.clear();  
  obniz.display.print('buttonA was pushed');  
};
```

# Button

```
obniz.buttonA.onchange = (state) => {  
  obniz.display.clear();  
  obniz.display.print('buttonA was pushed');  
};
```

# 6軸センサ

```
obniz.setupIMUWait().then(() => {  
  let interval;  
  interval = setInterval(() => {  
    obniz.imu.getAccelWait().then((accel) => {  
      obniz.display.clear();  
      obniz.display.print(`accX: ${accel.x}`);  
      obniz.display.print(`accY: ${accel.y}`);  
      obniz.display.print(`accZ: ${accel.z}`);  
    });  
  }, 300);  
});
```
